

February 3, 2025 – LinkedIn Post by Ron Wasserstein, ASA Executive Director

Throughout our 185-year history, the ASA has consistently advocated for the essential role of statistical expertise in the federal workforce to collect, analyze, and disseminate reliable, accurate, and timely data that informs critical policy and business decisions. We remain unwavering in this commitment.

We continue to champion federal research funding as a cornerstone of discovery and innovation. Our ongoing advocacy focuses on ensuring robust support for statistical science, which is vital for addressing complex national challenges and maintaining America's research leadership. To better serve you, we invite your feedback through our anonymous [JotForm survey](#) on your challenges and needed support. (You do not need to be an ASA member to respond using the JotForm.)
